For immediate release

H1 FY 15 Net Revenue at ₹ 2.77 billion – growth of 19%
EBITDA of ₹ 648 million – growth of 33%
PAT at ₹ 381 million – growth of 34%

- ***Strong performance in Q2 FY 15 – in terms of turnover & order booking***
- ***56% increase in PAT in Q2 FY 15***
- ***Strong order booking of ₹ 2.9 billion during the half year – a y-o-y growth of 47%***
- ***Strong carry forward Consolidated order book at ₹ 7.7 billion***

Bengaluru, November 12, 2014: Triveni Turbine Limited (TTL), market leader in steam turbines upto 30 MW, today announced its performance for the quarter and half year ended 30th September 2014 (Q2/H1 FY15).

PERFORMANCE OVERVIEW:

April - Sep 2014 v/s April - Sep 2013
(H1 FY 15 v/s H1 FY 14)

- Net Revenue at ₹ 2.77 billion – increase of 19%
- EBITDA of ₹ 648 million with a margin of 23.4%, an increase of 33%
- Profit before Tax (PBT) at ₹ 566 million with a margin of 20.4%, an increase of 34%
- Profit after tax (PAT) at ₹ 381 million with a margin of 13.8% - increase of 34%
- EPS for H1 (not annualized) at ₹ 1.15 per share

**July - Sep 2014 v/s July - Sep 2013
(Q2 FY 15 v/s Q2 FY 14)**

- Net Revenue at ₹ 1.56 billion – increase of 27%
- EBITDA of ₹ 394 million with a margin of 25.3% -an increase of 52%
- Profit before Tax (PBT) at ₹ 354 million with a margin of 22.7%
- Profit after tax (PAT) at ₹ 239 million with a margin of 15.3% - increase of 56%
- EPS for Q2 (not annualized) at ₹ 0.72 per share

Commenting on the Company's financial performance, Mr. Dhruv M. Sawhney, Chairman and Managing Director, Triveni Turbine Limited, said:

"The turnover and profitability of the Company in H1 FY 15 has been in line with our expectations. While the turnover showed a growth of 19%, the growth in profitability has shown a strong improvement of 34%. The domestic capital goods sector, which was reeling under tremendous slowdown for the past few years, started showing some signs of revival in the form of more enquiries and customer meetings during the quarter, which we believe will start resulting into finalization of orders in the coming couple of quarters. Similarly, the signs of revival in capital good segment will also be reflected once we see an improvement in infrastructural spending as well as fresh investments in the key user industries in the domestic market, which we are hopeful of happening in the ensuing quarters.

The increased order booking which we saw in Q1 FY 15 continued into the second quarter. Even though the domestic market has not shown any improvement, Triveni, due to its increased market share, has seen an increase in order in-take quarter over quarter, which we believe is a healthy sign. The company's focus on the export market and spreading its geographic reach is also gaining momentum. During the first six months of the year, the company has already exceeded its last full year's order booking from international market. Overall the outlook in the export market is quite robust and the company expects a strong order booking in the coming quarters from the export market so as to have a significantly higher export order booking for FY 15.

The order intake in the high margin after-market business has also shown an improvement during the quarter with an order inflow of ₹ 380 million, which we believe will help us in achieving a good growth in the aftermarket business for the year as a whole.

The order inflow in the JV for the quarter and half year has also been good with the business booking one more international order during the quarter taking the overall order book to ₹ 2.4 billion. With a strong order backlog, the year under review should help the JV to achieve a significant turnover, which is expected in the second half of the financial year.

Overall, with a robust carry forward order book of ₹ 7.7 billion on a consolidated basis, we believe that the company should achieve significant growth in turnover on both standalone and consolidated basis during FY 15.”

- ENDS -

Attached: Details to the Announcement and Results Table

About Triveni Turbine Limited

Triveni Turbine Limited (TTL) is a focused and growing corporation which has been helping customers in achieving power self-sufficiency as well as sustainability with engineered-to-order steam turbines upto 30 MW along with unparalleled after-sales services. The business of the company was demerged from Triveni Engineering & Industries Limited subsequent to a court approved demerger scheme. TTL is the market leader in the steam turbines with state-of-the-art manufacturing facility located in Bengaluru.

Triveni's market leadership has been built on a foundation of strong and continuously evolving research, development and engineering capabilities. The customer centric approach to R&D, along with a keen focus on delivered product and life-cycle cost has allowed Triveni to set benchmarks for efficiency, robustness and up-time of the turbine. A strong internal team, strengthened by collaborative associations with globally leading design and research institutions, has placed Triveni at the forefront of a technically challenging field dominated by large multi-nationals.

Supply of the turbine doesn't end Triveni's engagement with a customer. Instead, it marks the beginning of an unending relationship that ensures smooth commissioning and 360 degree after-sales services including annual maintenance, refurbishment, spares and much more.

GE Triveni Limited (GETL) is a subsidiary of Triveni Turbine Limited (TTL) and a joint venture with GE. GETL is engaged in design, supply and service of advanced technology steam turbines with generating capacity of above 30 to 100 MW. Headquartered in Bengaluru, GETL turbines are manufactured at state-of-the-art plant of Triveni Turbine Ltd. The products are marketed under "GE Triveni" brand globally.

Q2/H1 FY 15: PERFORMANCE REVIEW

(All figures in ₹ million, unless otherwise mentioned)

TTL is the domestic market leader in steam turbines up to 30 MW. It has maintained its dominance consistently over the years and is one of the largest manufacturers worldwide in high and low pressure turbines in this range. The company's ability to provide high-tech precision engineered-to-order solutions has made it one of the most trusted names within the sector.

Performance Review

	Q2 FY 15 July - Sept 2014	Q2 FY 14 July - Sept 2013	% change	H1 FY 15 Apr - Sept 2014	H1 FY 14 Apr - Sept 2013	% change
Net Revenue	1558	1229	27%	2769	2335	19%
EBITDA	394	259	52%	648	488	33%
EBITDA Margin	25.3%	21.1%		23.4%	20.9%	
Depreciation & Amortisation	40	32	24%	81	64	27%
PBIT	354	227	56%	567	424	34%
PBIT Margin	22.7%	18.5%		20.5%	18.2%	
Finance cost	0.2	1.2	(80%)	1.5	3.7	(61%)
PBT	354	226	57%	566	421	34%
PBT Margin	22.7%	18.4%		20.4%	18.0%	
PAT	239	153	56%	381	284	34%
PAT Margin	15.3%	12.4%		13.8%	12.2%	

- The net sales for the quarter and half year under review have been higher by 27% and 19% respectively.

- The after-market business grew by 35% during H1 FY 15 and the proportion of the after-market sales to total sales has improved from 23% in H1 FY 14 to 26% in H1 FY 15.
- The export turnover has gone up by 22% in H1 FY 15 to ₹ 893 million and the proportion to the total sales has also gone up from 31% in H1 FY14 to 32% in H1 FY 15.
- During the H1 FY 15, the product order intake has been ₹ 2.3 billion, which is a growth of 64% in comparison to the corresponding period of last year.
- The overall order booking at ₹ 2.9 billion, including aftermarket order booking of ₹ 610 million, has grown by 47% in comparison to the corresponding period of last year.
- The outstanding order book on a standalone basis, as on 30th Sep 2014 has been ₹ 6.0 billion including refurbishment orders, while on a consolidated basis, the order book is ₹ 7.7 billion.

Outlook

The domestic market upto 30 MW has shown a marginal increase in FY 14, after showing a decline year on year during FY 12 & 13. The major segments of demand are sugar & other process co-generation and to some extent steel. The demand for PCG primarily came from Paper, Food processing, Textiles, Chemical Industries etc. The demand continues to be robust from waste heat recovery / cost reduction capex as well as brown field expansions in certain segments.

While the overall domestic market still remain more or less at the same level as last year, there has been an increase in new enquiries and the customers are restarting the discussions on many enquiries, which are expected to start finalising from Q4 FY 15 onwards. The company could improve its market share as the order finalized in Q2 FY 15 has been significantly higher than the corresponding period of last year. We believe, in the coming quarters, we should witness policy initiatives which in turn should result in fresh investment in infrastructure and other industrial segments. This should eventually lead to new enquiries and order finalization.

The company's focus on exports is gaining momentum with expanded geographies. The order booking for the first half exceeded the full year booking of last year from the international market. With the expanded market reach compared to the previous year, the company believes that its export business going forward will bring significant contribution in its growth strategy and the similar trends in order booking should continue.

With the increase in numbers of higher MW turbines installed, the business from spares & servicing should also increase going forward. The aftermarket business turnover during H1 FY 15 has been higher by 35% and the order inflow during Q2 FY 15 has also been significantly higher when compared to Q2 FY 14. The mix between product and after-market in turnover has also improved from 77:23 to 74:26. The company, during the past few years has been undertaking the refurbishment of higher sized turbines and the same should help the company to get more orders in that segment going forward.

The availability of consistent and reliable power for the industrial sector remains a challenge. This has resulted in the setting up of captive generation facilities and will also have an impact on the cost of production for many of these units. This has been the main driving force for demand of our products and is expected to remain in the future as well. Similarly, biomass based IPPs are gaining importance especially in the global market, wherein TTL's credentials are good both from a domestic and international installation perspective. Another emerging area which, even under the globally stressed economic situation, will find opportunity is from waste to energy, which also addresses the cost of production of the user industry. With the company's focus on research & development and also its ability to access new markets, we expect the business to grow significantly in the future.

With the new government in place, the overall economic activities are expected to gain momentum which should result in increased order booking. Once the industrial capital expenditure starts, the company believes that the business in the domestic market should pick up. The company is geared with wide range of cost competitive and efficient product portfolio and it is expected that the year on year performance for the company in FY 15 should be far better than FY 14 both in terms of turnover and profits.

GE Triveni Limited

During the quarter, the joint venture with GE, GE Triveni Limited, has received one order from the international market worth ₹ 190 million. With a strong order backlog and enquiry book, the business is expected to gain momentum in the coming year with much higher turnover. The JV is currently pursuing a strong enquiry book, which is expected to result in strong order booking for the JV during the current year.

After establishing presence through installation of steam turbines in the domestic market and with good order in-flow from international market, the company expects to achieve a significantly higher turnover and order inflow in the current financial year. The company has a strong enquiry book both in the domestic market and international markets which are being pursued by the marketing teams of the respective JV partners in their territories.
