For immediate release

**FY 14 net sales at ₹ 5.06 billion
PAT at ₹ 685 million**

- ***Year on year lower turnover and profits – on account of the macro economic situation***
- ***Delayed order finalization and deferment of deliveries in H1 resulted in lower turnover & profits***
- ***Strong carry forward Consolidated order-book at ₹ 7.1 billion (45% y-o-y growth) – good visibility for FY 15***
- ***Total Dividend 75% including final dividend of 55 %***

NOIDA, May 27, 2014: Triveni Turbine Limited (TTL), market leader in steam turbines upto 30 MW, today announced its performance for the fourth quarter and financial year ended 31st March 2014.

PERFORMANCE OVERVIEW:

**April - March 2014 v/s April - March 2013
(FY 14 v/s FY 13)**

- Net Sales at ₹ 5.06 billion
- EBITDA of ₹ 1.15 billion with a margin of 22.7%
- Profit before Tax (PBT) at ₹ 1.01 billion - with a margin of 20.0%
- Profit after tax (PAT) at ₹ 685 million with a margin of 13.5%
- EPS for FY 14 at ₹ 2.07 per equity share

**January - March 2014 v/s January - March 2013
(Q4 FY 14 v/s Q4 FY 13)**

- Net Sales at ₹ 1.31 billion
- EBITDA of ₹ 325 million with a margin of 24.8%
- Profit before Tax (PBT) at ₹ 291 million with a margin of 22.2%
- Profit after tax (PAT) at ₹ 193 million, with a margin of 15.0%
- EPS for Q4 (not annualized) at ₹ 0.58 per equity share.

Commenting on the Company's financial performance, Mr. Dhruv M. Sawhney, Chairman and Managing Director, Triveni Turbine Limited, said:

"The turnover and profitability of the Company in FY 14 has been below our expectations due to challenging economic and market conditions. The domestic capital goods sector has been experiencing slowdown for the past few years. The slowdown in infrastructure as well as key user industries in the domestic market has impacted the capital goods industry resulting in sluggish order inflows, delay in taking deliveries/execution of projects, delayed payments etc. The increased volatility in the financial markets and currency volatility in the addressable overseas markets has affected the conversion of enquiries into orders especially in the first half of the year. This has resulted in lower exports order booking and international sales. All these factors affected the turnover for the full year.

This was visible at the end of second quarter itself when the order-inflow was abysmally low. However, the second half of the year saw significant recovery in order intake which enabled us to maintain the order intake for the full year at more or less similar levels as previous year in spite of tough economic environment across the globe. TTL succeeded in improving its market share from 58% in FY13 to 63% in FY 14 in its range upto 30 MW even in the current domestic market situation, and in export market, established leadership position in certain segments in some geographies. On the order execution side, the financial constraints of some customers have resulted in deferment of deliveries and consequently impacted the revenue recognition both domestically and

internationally. Lower turnover also impacted the margins as the full absorption of fixed overheads could not be achieved.

During the year, the company continued its expansion of territories for exports. Our international spread is expanding, we have been well received in the countries that we are approaching and they range from South and Central America to Southeast Asia, the Far East, Africa and parts of Europe.

The high margin after-market business also had similar volatility as experienced in the product business. Even though the overall turnover fell by 25% year on year, the aftermarket sales were lower by 13%. With a strong focus on aftermarket especially in the refurbishment business, we expect the aftermarket sales to pick up internationally in the coming years.

The progress in the joint venture with GE has been encouraging and the order booking for FY 14 has been ₹ 1.8 billion which is significantly higher than previous year with the company getting orders for three turbines from South East Asian market. With the growth in the current order book position, both in domestic and international markets, the outlook of the Joint Venture for the coming years is positive.

Overall, with a strong carry forward order book of ₹ 7.1 billion on a consolidated basis and a strong consolidated order booking in the first two months of the current financial year, we believe that the company should achieve consolidated growth in turnover of 35% – 40% while maintaining the margins at current level, during FY 15.”

- ENDS -

Attached: Details to the Announcement and Results Table

About Triveni Turbine Limited

Triveni Turbine Limited (TTL) is a focused and growing corporation which has been helping customers in achieving power self-sufficiency as well as sustainability with engineered-to-order steam turbines upto 30 MW along with unparalleled after-sales services. The business of the company was demerged from Triveni Engineering & Industries Limited subsequent to a court approved demerger scheme. TTL is the market leader in the steam turbines with state-of-the-art manufacturing facility located in Bengaluru.

Triveni's market leadership has been built on a foundation of strong and continuously evolving research, development and engineering capabilities. The customer centric approach to R&D, along with a keen focus on delivered product and life-cycle cost has allowed Triveni to set benchmarks for efficiency, robustness and up-time of the turbine. A strong internal team, strengthened by collaborative associations with globally leading design and research institutions, has placed Triveni at the forefront of a technically challenging field dominated by large multi-nationals.

Supply of the turbine doesn't end Triveni's engagement with a customer. Instead, it marks the beginning of an unending relationship that ensures smooth commissioning and 360 degree after-sales services including annual maintenance, refurbishment, spares and much more.

GE Triveni Limited (GETL) is a subsidiary of Triveni Turbine Limited (TTL) and a joint venture with GE. GETL is engaged in design, supply and service of advanced technology steam turbines with generating capacity of above 30 to 100 MW. Headquartered in Bengaluru, GETL is committed to develop and bring to the steam turbine market, superior technology. GETL turbines are manufactured at state-of-the-art plant of Triveni Turbine Ltd. The products are marketed under "GE Triveni" brand globally.

Q4 & FY 14: PERFORMANCE REVIEW

(All figures in ₹ million, unless otherwise mentioned)

TTL is the domestic market leader in steam turbines up to 30MW. It has maintained its dominance consistently over the years and is one of the largest manufacturers worldwide in high and low pressure turbines in this range. The company's ability to provide high-tech precision engineered-to-order solutions has made it one of the most trusted names within the sector.

Performance Review

	Q4 FY 14	Q4 FY 13	FY 14	FY 13
Net sales	1313.2	1,905.8	5056.9	6,568.5
EBITDA	325.3	471.0	1148.2	1,716.3
EBITDA Margin	24.8%	24.7%	22.7%	26.1%
Depreciation & Amortisation	32.5	30.7	128.6	122.6
PBIT	292.8	440.3	1019.6	1,593.7
PBIT Margin	22.3%	23.1%	20.2%	24.3%
Interest	1.4	0.7	6.0	27.2
PBT	291.4	439.6	1013.6	1,566.5
PBT Margin	22.2%	23.1%	20.0%	23.8%
PAT	192.7	305.9	684.5	1,066.3
PAT Margin	14.7%	16.1%	13.5%	16.2%

- The FY 14 turnover was lower by 23% on account of much lower order booking in the first half of the year and also on account of deferment of deliveries.
- The after-market sales have shown decline of 13% which is expected to improve in the coming years both from services and spares of own turbines and also third party refurbishment.
- The proportion of exports sales to total sales has shown an improvement at 29% from 27%.
- The outstanding order book on a standalone basis, as on 31st March 2014 has been ₹ 5.8 billion including refurbishment orders, while on a consolidated basis, the order book is ₹ 7.1 billion.

Outlook

The domestic market upto 30 MW has shown a marginal increase in FY 14, after showing a decline year on year during FY 12 & 13, and the improvement took place mainly in the second half of the year. The major segments of demand are sugar & other process co-generation and to some extent steel. The demand for PCG primarily came from Paper, Food processing, Textiles, Chemical Industries etc. However, the demand continues to arise from waste heat recovery / cost reduction capex as well as brown field expansions in certain segments. In spite of tough market situation and competition getting aggressive, TTL could improve its market share from 58% in FY 13 to 63% in FY 14.

The company's focus on exports is gaining momentum with expanded geographies. The order booking from the export market during the first half was significantly lower in comparison to FY 13 which resulted in overall year on year decline in order booking in the export market. However, with the expanded market reach compared to the previous year, the company believes that its export business going forward will bring significant contribution in its growth strategy.

With the increase in numbers of higher MW turbines installed, the business from spares & servicing should also go up considerably going forward. The aftermarket business was also impacted on account of the general economic slowdown. The company, during the

past few years has been undertaking the refurbishment of higher sized turbines and the same should help the company to get more orders in that segment going forward. During the year new initiatives were taken to ensure that the focus on customer satisfaction and business growth are not compromised which led to new markets and segments being opened up in spares and refurbishing business which should augur well for the business in the coming years. The Company forayed into international market in aftermarket business which should help to grow this line of business both domestically and internationally in the coming years.

The availability of consistent and reliable power for the industrial sector remains a challenge and has resulted in setting up of captive generation facilities. This will also have an impact on the cost of production for many of these units and has been the main driving force for demand of our products and is expected to remain in future as well. Similarly, biomass based IPPs are gaining importance especially in the global market, wherein TTL's credentials are good both from domestic and international installation perspective. Another emerging area which even under stressed economic situation will find opportunity, is from waste to energy, which also addresses the cost of production of the user industry. With the company's focus on research & development and also its ability to access new markets, we expect the business to grow significantly in the future.

With the new government in place, the overall economic activities are expected to gain momentum which should result in increased order booking. Once the industrial capital expenditure starts, the company believes that the business in the domestic market should pick up. The company is geared with wide range of cost competitive and efficient product portfolio.

With the general economic slowdown coupled with fluctuating currencies and political unrest in some of our addressable export markets, both the order booking and despatches were impacted during FY14. However, with the company's focused approach towards expanding its exports to newer geographies, the company believes that the export business would grow significantly in the coming years. The addressable segments in the exports market such as biomass based IPPs, district heating and Sugar co-generation segments are also showing signs of improvement in many countries across the globe.

The order inflow in the first two months of the current year has also been encouraging both for TTL and GETL. The majority of the outstanding order book is for delivery during the current financial year. This augers well for the business in terms of achieving a strong growth in turnover for the current year with the profit margins being maintained at FY 14 levels.

GE Triveni Limited

During the year, the joint venture with GE, GE Triveni Limited, has received orders worth ₹ 1.8 billion. The company received three turbine orders from international market and two turbine orders domestically. With a strong order backlog and enquiry book, the business is expected to gain momentum in the coming year. The JV also concluded another major order in the first two months of FY15 from the international market.

After establishing presence through installation of steam turbines in the domestic market and with good order in-flow from international market, the company expects to achieve a significantly higher turnover and order inflow in the current financial year. The company has a strong enquiry book both in the domestic market and international markets which are being pursued by the marketing teams of the respective JV partners in their territories.
