Solution For Industrial Applications

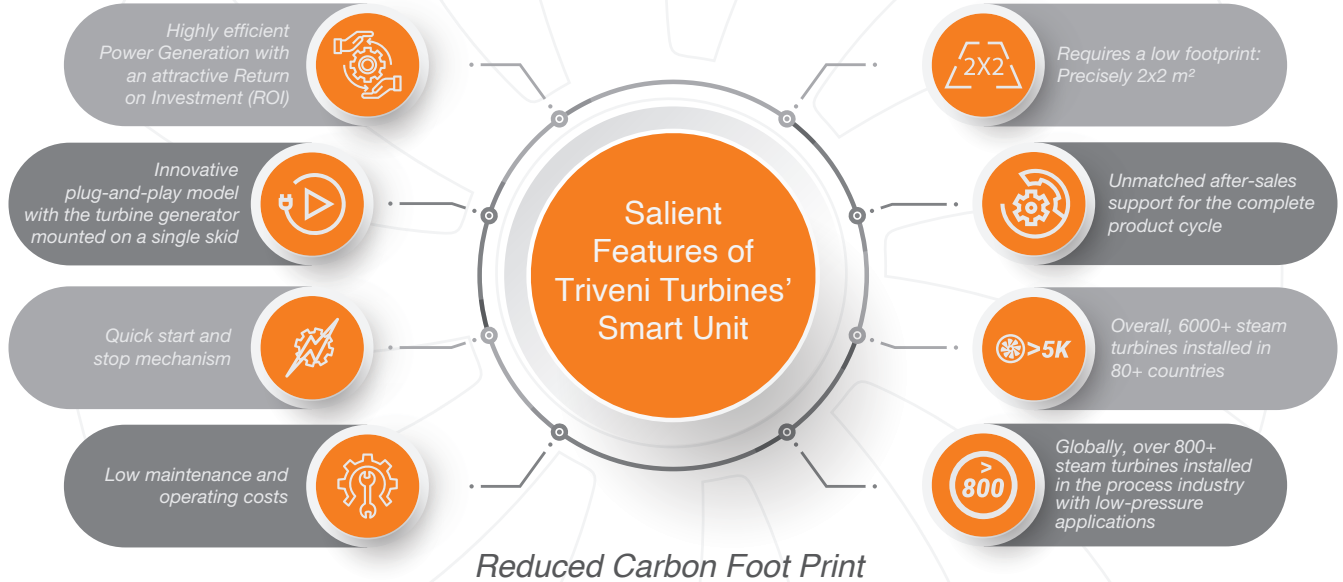

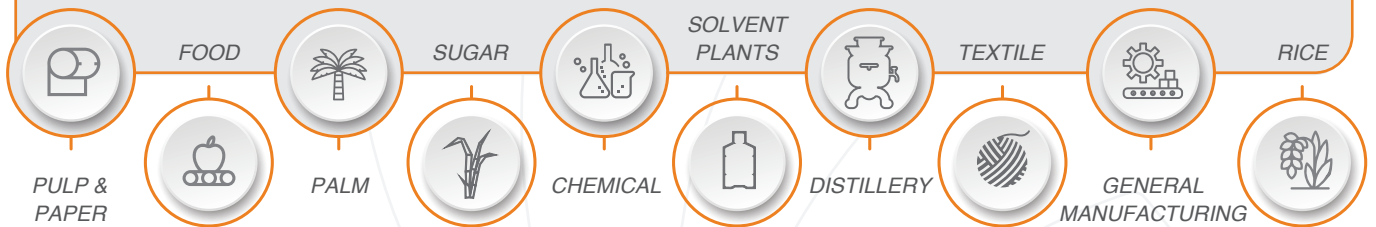

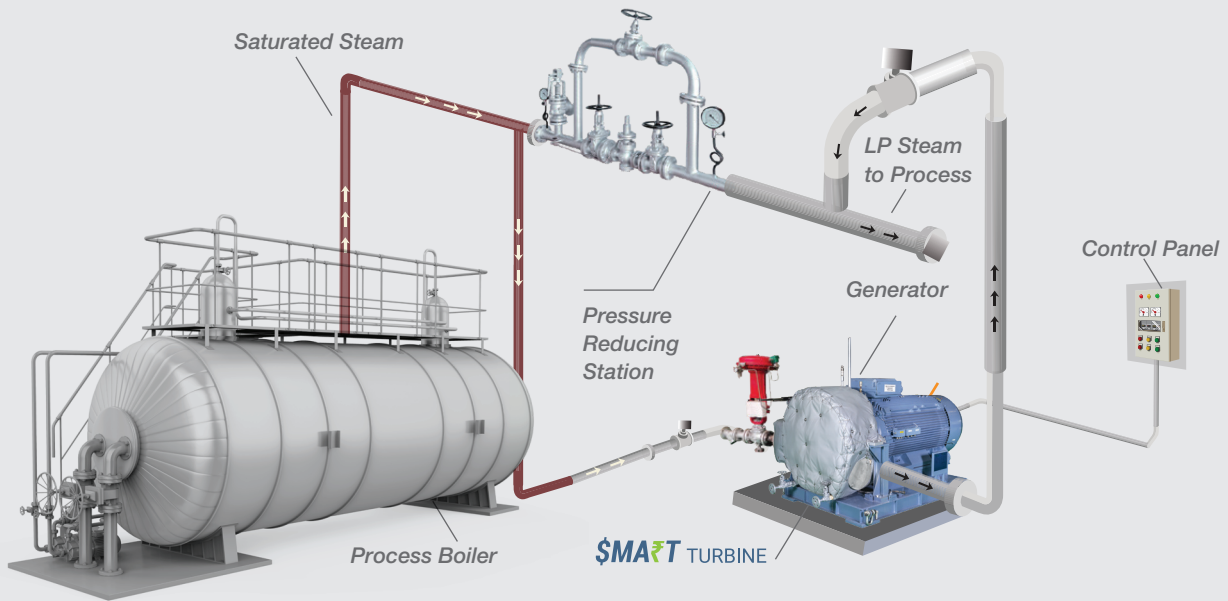

Triveni Turbines'
Micro steam turbines
for PRDS / PRV

Micro
Steam Turbines

Triveni Turbines offers SMART (Sustainable Modularly Arranged Pressure Reducing Turbine) units, which are essentially backpressure steam turbines. These units perform the same function as **pressure-reducing** stations while simultaneously generating **additional electricity** by converting steam energy into electrical energy.

Operating on Saturated Steam

TURBINE SPECIFICATIONS

Minimum Inlet Pressure: 7 kg/cm² G and above | Minimum Exhaust Pressure: 1 kg/cm² G and above
Minimum Power: 50 kw and above
